Atherton Material Handling (AMH). Station Road, Common Lane, Ranskill, Retford, Nottinghamshire, United Kingdom, DN22 8LW

Atherton Material Handling provides top quality new and used / second hand conveyor belts to customers throughout the country. We offer full services, repairs and maintenance contracts along with a full range of conveyor belt products such as belt scrapers & belt fastening products. Our conveyor belt products available primarily fall into 6 main categories, being: Chevron Conveyor Belts, Friction Back Conveyor Belts, Standard Flat and Grip Top Belt systems. We also provide full belt vulcanising services and have a great rolling stock range of second hand conveyor belts. Please select from the belt options below for product details, specification and individual product enquiries.

We can supply stationary or mobile conveyors in either all new or fully reconditioned units from our large stocks held at our Ranskill quarters, Retford in Nottinghamshire.

## Standard / Flat Conveyor Belts

**Atherton Standard Flat Conveyor Belts** are designed to handle the toughest conveying applications. Manufactured with high abrasion covers to DIN22102 standards.

Our EP fabric rubber conveyor belts are designed to operate in a wide range of industries for transporting abrasive materials such as cement, coal, granite, gravel, recycled material etc. Standard flat conveyor belt from Atherton Material handling are resistant to temperatures from - 30 oc up to + 80 oc. We can offer a range of belt 2ply to 5ply, and widths from 400mm to 2500mm wide.

## Chevron Conveyor Belts

**Atherton Chevron Conveyor Belts** are specifically designed for steep inclined conveying.

We can offer 15mm and 25mm high cleats where they deliver increased capacity when carrying bulk materials with a lump size up to 150mm, such as stone, sand, fertiliser, coal, potatoes etc.

Please give us a call so we can help you select the right chevron belt for your application.

## Conveyor Skirt Rubber

**A common problem can occur when the grade of the conveyor belt skirt rubber is too hard, or when old conveyor belt is cut down and used for skirting.**

Grooves are often worn into the belt leading to severe damage, or in the worst case scenarios, belt failure. This risk can be greatly reduced by using a 65 shore hardness skirt rubber that is available in 10mm thickness & supplied in roll lengths of 10mtrs.

Our Skirt Rubber can be supplied in either 100mm, 150mm or 200mm widths.

For more information and enquiries on the Atherton Skirt Rubber, please Contact AMH directly. Telephone us on **01777 817000**

We're here ready to help with any questions you may have, and deal with your requirements quickly and effectively.
